

# 4 reasons to be careful at work

**When it comes to preventing accidents, each of us has four responsibilities:**

**First**, we have a responsibility to *ourselves* not to get injured.

**Second**, we have a responsibility to *our families*: when we are injured we are unable to provide for them.

**Third**, there is the responsibility we have to *our co-workers*. Our actions must not endanger our fellow employees.

**Fourth**, there is a responsibility we have to *our department*. Employee injury has a negative impact on the productivity and health of the whole department.
