

ASTR 170 B1 – The Physical Universe - Section 02 Spring 2019

Class meets Tuesday and Thursday: 2:00 PM – 3:15 PM
Location: Steward Observatory Room N210

Description of Course

“The Physical Universe” course provides a detailed investigation of the Universe. You will learn to understand physical concepts of light, matter, force, energy, heat, and temperature that can be used to develop explanatory models for the origins and behavior of planets, stars, galaxies, space, and time. Through your investigations you will develop possible answers for fundamental questions like - How did it all begin? Are we alone? What does the future hold for the Universe?

Course Prerequisites or Co-requisites
None

Instructor and Contact Information

Prof. Tim Eifler
Office: Steward Observatory RM 312
timeifler@email.arizona.edu
520-621-5448
Office Hrs: Wednesday 3.30-4.30 pm, or make appointment via email

Teaching Assistants: David Lesser - dhlessler@email.arizona.edu
Office: T110
Help Session: Thursday 10-11 am (Additional Help Sessions TBA)

Course Objectives and Expected Learning Outcomes

The overarching goal of this course is for you to develop scientifically accurate models of the objects, events, and processes of the Universe. This course is designed to help you develop your communication skills, quantitative literacy, critical reasoning ability, and evidence-based problem solving skills. By helping you improve your understanding of the big ideas in astronomy, we hope you will develop a lifelong interest in science and current events surrounding the study of the universe. Additionally, we hope to connect key discoveries in science to your worldview so that you come to appreciate the incredibly valuable role that science plays in society. To meet these goals, the course instructor has carefully designed in and out of class activities, learning resources, and assessment strategies as outlined below and in the following sections.

Engaging in student-to-student discourse is a significant component of success in this course. By working in small collaborative discussion groups, you will learn how to interpret, judge, synthesize, and communicate about a wide variety of content central to astronomy. This collaborative work will improve your scientific thinking so that you can successfully explain your reasoning and defend your ideas about the complex science topics presented throughout the semester. The course will help you develop your quantitative skills through a wide range of predictive and estimation tasks, as well as graphical extrapolation and interpretive tasks using data provided in lecture slides and associated active learning activities. You will increase your data fluency through your generation of discipline representations that explicitly involve creation of tables, graphs and other data representations and science visualizations. By repeatedly being asked to create, defend, and edit written explanations and narratives, you will develop more expert abilities to write concise and coherent accounts of the physics in our Universe. Through your outside of class research and in-class historical writings, you will gain confidence in your ability to describe how important science discoveries, advancements in health and medicine, and technological innovations have ended suffering and improved the quality of life of citizens from

around the globe.

Course Format and Teaching Methods

–Active engagement in collaborative learning activities occurs daily and is REQUIRED. There exists significant research to document that students’ intellectual engagement and levels of learning are significantly limited in classrooms that only use lecture, no matter how clear or entertaining. Therefore, we will include a variety of active-learning activities during class. These active-learning activities are designed to promote a deep level of intellectual engagement, as well as foster discourse on specific ideas that are known to be difficult for students to develop a robust understanding of from lecture alone. By working earnestly and collaboratively with your peers, you will develop a more expert-like knowledge of the topics under investigation. A significant emphasis of course homework is placed on assessing how well you are able to explain your reasoning (both verbally and in writing) to the types of questions asked in these active-learning activities. You will not turn in your in-class active-learning activities for grading. Since the questions in these activities are similar to the questions on course homework and quizzes/exams, you will greatly benefit from working outside of class to be sure you fully understand the answers and explanations for your answers. You should consider these activities as “ungraded homework” deserving of a significant amount of out-of-class study time as they will greatly help you in the quizzes and the final.

–Participation and Engagement is REQUIRED. Your attendance and full participation at each class period will be an essential component of your success in the course – and should be considered mandatory. We will conduct regular scheduled in-class quizzes on the content of the current reading assignment and lecture material. The quizzes will be a larger but conceptually very similar version of the in-class activities and participation in the activities will significantly improve your performance during the quizzes. Quizzes document both your participation and activity in class and they will be completed and collected during class. In general, you will not be allowed to make up any missed in-class quizzes (see the “Absence and Class Participation Policy” section below for more information on arranging for make-up work related to excused absences). Therefore, to allow for the unavoidable periodic absences (that naturally arise during the semester) without heavily penalizing your overall course grade, we will calculate your end of the semester participation and writing grade based on the following points/grading scheme:

- 80% or more of participation and writing points – A
- 70% - 79% of participation and writing points – B
- 60% - 69% of participation and writing points – C
- 50% - 59% of participation and writing points – D
- 49% or less of participation and writing points – E

This grading scheme is only for your participation and writing grade, not your overall end-of-semester grade (which is calculated from all components of class).

NOTE: YOU DO NOT NEED TO NOTIFY US WHEN YOU ARE ABSENT FROM CLASS (unless you will be using a Dean’s Excuse or have the appropriate third-party medical documentation).

Absence and Class Participation Policy

As outlined in the Course Format and Teaching Methods section above, a significant amount of the course content and course work will be presented and done in-class. Participating in collaborative student discussion, active learning activities are an essential part of course success. As such, attendance at all class meetings is considered mandatory. Missing a significant amount of class meetings will result in a significantly lower overall course grade (see the Course Format and Teaching Methods section and the Grading Scale and Policies section). This course complies with the UA’s policy concerning Class Attendance, Participation, and Administrative Drops (available at: <https://catalog.arizona.edu/policy/grades-and-grading-system>). Making up missed class work will be handled on a case-by-case basis. **If you know you will be missing class and wish**

to have your case considered for make-up, you are required to communicate the date and circumstances for your absence via an email to the professor at least one week in advance. Students who miss class due to illness or emergency are required to bring documentation from their healthcare provider or other relevant, professional third parties. Failure to submit third-party documentation will result in unexcused absences. If you are attending a university sanctioned sports or club event you are required to obtain a Deans excuse for this absence. This course complies with the UA policy regarding absences relating to religious belief, observance or practice (see policy at <http://policy.arizona.edu/human-resources/religious-accommodation-policy>), and with the policy regarding absences pre-approved by the UA Dean of Students.

Course Communications

All information about this course is communicated through a combination of the Syllabus, announcements provided on the course D2L site, information provided in the Powerpoint slides, and announcements made in-class.

Required Texts or Readings

- 1) <https://openstax.org/details/books/astromony>
Specific Chapters and pages will be suggested for each lecture via standard course communication
- 2) *Lecture-Tutorials for Introductory Astronomy*, Third Edition, Prather, E. E., Slater, T. F., Adams, J. P., and Brissenden, G., with contributions from Dostal, J. A., Wallace, C. S., and Keller, J. M. 2012, Pearson Prentice Hall, ISBN 0-32-182046-0. **NOTE: BRING LECTURE-TUTORIAL BOOK TO CLASS EVERYDAY!**
- 3) Bring your feedback (ABCD) card to every lecture!

Required Extracurricular Activities

During the semester you are required to participate in **ONE** evening of observing the universe using the Steward Observatory public telescope, located in the courtyard of the Steward Observatory building on campus. Observing times are available Monday – Thursday evenings starting at approximately 7:00 PM. You are required to sign up for your observing time before going to the telescope using the observing roster/sign-up sheets located in the main floor (lobby) of the Steward Observatory building. Bring the “*Observing Log*” sheet that is attached to the end of this syllabus with you to the telescope. **You must have the Observing Log stamped by the Telescope Operator.** See further details written on the Observing Log for additional information regarding what to draw and what to write to complete your Observing Log. Note: the Steward Observatory telescope is only open at night, it cannot operate when it is cloudy, and there is a set number of people who can sign up for any given timeslot. Therefore, we recommend that you sign up early in the semester. Although we recommend that you submit your Observing Log very soon after completing your night of observing, they will also be accepted through **Tuesday, April 30th (In Class)**. **No late Observing Logs will be accepted for ANY reason past Tuesday, April 30th.**

Homework Assignments, Quizzes and Examinations: Schedule/Due Dates

Homework is a significant part of course success. Homework problem sets will be provided via D2L. The purpose of these homework problem sets is to help you access and strengthen your understanding of key course topics and to better prepare you for the course quizzes/exams. The content of EVERY homework problem set will be emphasized on the corresponding quiz/exam. As a result, it is expected that you will work through ALL of the homework problem sets in sequence with the flow of topics presented in the course (see the “In Class Activity Schedule” below). You are required to turn in your best 10 completed homework problem sets at the end of the semester. You must submit these 10 problem sets in a folder (do NOT use a three ring binder, or a paperclip) with your name and Student ID number CLEARLY written on BOTH the FOLDER and EACH of the 10 problem sets. **The deadline to submit your homework problem set folder is**

Tuesday, April 30th, in class. No late homework problem sets will be accepted.

As mentioned above there will be several short quizzes given in-class during the semester, and one cumulative Final Exam given at the end of the semester. All information about the schedule and topics of the in-class quizzes will be communicated through lecture, in the course Powerpoint slides (available on D2L), and through announcements posted on the course D2L webpage. Please do not make any plans that interfere with quiz times once they have been scheduled, as there are no late or make-up quizzes given. **If you need to miss a quiz, you will not be allowed to make up this quiz unless you have a prior approved Dean's excuse or documented medical excuse. You cannot be excused from the final exam, and there are no opportunities to take it at a different time.** The University has scheduled the time for the class final exam and this is the only time it is to be offered. During quizzes/exam you must bring a photo ID, you are not allowed to wear headphones, and you are not allowed to communicate with anyone in the classroom except for the course instructors and exam proctors. You must turn in your quiz or exam question booklet and answer sheet immediately upon completing it. Possession of course quizzes or exams booklets outside of class will result in being failed from the course. If you have been certified as needing to take an exam under special circumstances, please make the necessary arrangements with the Disabilities Resource Services Center well in advance of the exam date (at least 10 days).

<u>Dates</u>	<u>Tentative In-Class Activity Schedule</u>
1/10	Introduction, Syllabus
1/15 – 1/17	Science and the Universe: A Brief Tour Observing the Sky: The Birth of Astronomy
1/22 – 1/24	Orbits and Gravity Galileo, Kepler, Newton
1/29 – 1/31	Radiation and Spectra Astronomical Instruments Quiz 1
2/5 – 2/7	Light and Electromagnetic waves Analyzing Starlight
2/12 – 2/14	Doppler Shift Solar System - Earthlike Planets: Venus and Mars, The Giant Planets
2/19 – 2/21	The Sun: A Garden-Variety Star The Sun: A Nuclear Powerhouse Quiz 2
2/26 – 2/28	The Stars: A Celestial Census Celestial Distances
3/2 – 3/10	No Classes: Spring Break
3/12 – 3/14	Between the Stars: Gas and Dust in Space Stars from Adolescence to Old Age The Death of Stars

3/19 – 3/21	The Birth of Stars and the Discovery of Planets outside the Solar System Exoplanets
3/26 – 3/28	Dark Matter Black Holes and Curved Spacetime Quiz 3
4/2 – 4/4	The Milky Way Galaxy Galaxies
4/9 – 4/11	Active Galaxies, Quasars, and Supermassive Black Holes The Evolution and Distribution of Galaxies
4/16 – 4/18	The Big Bang Introduction to Cosmology
4/23 – 4/25	Cosmology Gravitational Lensing Quiz 4
4/30	Wrap up & Review Observing Logs Due Tuesday April 30th (In Class) Homework Folder Due Tuesday April 30th (In Class) LAST DAY of Class Tuesday April 30th
5/6 (Monday)	FINAL EXAM Monday May 6*, 3:30pm – 5:30 pm in Room N210

Final Examination

The course cumulative final examination will consist of approximately 50 multiple choice questions that assess content from the entire semester of topics. The date of the final exam is set by the university and no alternative times will be provided to take the exam. For more information about the testing policies and dates, see the “Assignments and Examinations: Schedule/Due Dates”.

Grading Scale and Policies

- | | |
|--------------------------------------|-----------|
| 1. Participation/Quizzes | 35% |
| 2. Final Exam (<i>cannot drop</i>) | 20% |
| 3. Homework | 35% |
| 4. Observatory Visit/Log | 10% |
| 5. Extra Credit | worth 10% |

90% – 100%	A
80% – 89.9%	B
70% – 79.9%	C
60% – 69.9%	D
≤59.9%	E
No plus or minus grades	

Your course grades can be accessed via D2L. An extra credit activity will be offered and content and requirements of said activity will be described on D2L and discussed in class. No late work is accepted (unless it is for a circumstance that satisfies one of the reasons outlined in the *Absence and Class Participation Policy* section). If you find a mistake with your posted scores, please contact your course TA as soon as possible. It is your responsibility to discover and notify your TA of any grading errors on D2L. All scores to your work in

the class are final 72 hours after they have been posted. Please make sure if you have any grading dispute that you contact your TA BEFORE this 72 hour period is over.

Requests for incompletes (I) and withdrawal (W) must be made in accordance with University policies, which are available at <https://catalog.arizona.edu/policy/grades-and-grading-system>

Honors Option

NA

Scheduled Topics/Activities

See the "Assignments and Examinations: Schedule/Due Dates" section.

Classroom Behavior Policy

To foster an equitable learning environment, students and instructors have a shared responsibility. We want a safe, welcoming, and inclusive environment where all of us feel respected and comfortable with each other and where we voice our ideas and challenge ourselves. To that end, our focus is on the tasks at hand and not on extraneous activities (i.e. texting, chatting, reading a newspaper, making phone calls, web surfing, etc). We ask that you come to class ready to fully engage and work collaboratively every day. We also ask that you respect your fellow classmates and their learning.

You are expected to know and follow the University of Arizona Code of Academic Integrity.

See: https://deanofstudents.arizona.edu/sites/deanofstudents.arizona.edu/files/code_of_academic_integrity.pdf

Students are asked to refrain from disruptive conversations with people sitting around them during class. Your behavior in class must not disrupt the teaching of the class or the learning of other students in class. Students observed engaging in disruptive activity will be asked to cease this behavior. Those who continue to disrupt the class will lose course participation points and may be reported to the Dean of Students.

Some learning styles are best served by using personal electronics, such as laptops, tablets, or iPads. These devices can be distracting to other learners and thus their use can degrade the learning environment. Therefore, students who prefer to use electronic devices for note-taking during talks will be asked to sit in a designated area of the classroom. Use of laptops, tablets and iPads for purposes that do not relate to the course will result in the loss of course participation points.

Violation of the course conduct policy can carry the following punitive actions: If you use your cell phone or it is visible, OR you choose to use your laptop/tablet for any reason other than for the purposes stated above, OR your behavior is determined by your professor or the course graduate teaching assistants to be disruptive to the learning of other students during class, you can be asked to provide your name and Student ID Number and you might lose one day of participation points. If your behavior is in violation of this course conduct policy three times during the semester, you will FAIL THE CLASS.

We consider academic dishonesty, including cheating, plagiarism, and fabrication, as defined in the UA Code of Academic Integrity, to be a serious offense and the maximum punishments allowed will be pursued in all scenarios. This includes content on writing assignments, homework assignments, or scantron forms. If nearly (or totally) identical work is submitted by more than one student, all parties involved may receive the maximum punishment for plagiarism and/or cheating. Your work must be unique and original. Again, note that you should never take a quiz/exam booklet or Scantron outside of the classroom for any reason. Possession of course quizzes or exams outside of class will result in being failed from the course.

Threatening Behavior Policy

The UA Threatening Behavior by Students Policy prohibits threats of physical harm to any member of the University community, including to one's self. See:
<https://policy.arizona.edu/education-and-student-affairs/threatening-behavior-students>

Accessibility and Accommodations

Our goal in this classroom is that learning experiences be as accessible, equitable and as inclusive as possible. If you anticipate or experience physical or academic barriers based on disability, please let me know immediately so that we can discuss options. You are also welcome to contact Disability Resources (520-621-3268) to establish reasonable accommodations. For additional information on Disability Resources and reasonable accommodations, please visit: <http://drc.arizona.edu/>

If you have reasonable accommodations, please plan to meet with me by appointment or during office hours to discuss accommodations and how my course requirements and activities may impact your ability to fully participate.

Please be aware that the accessible table and chairs in this room should remain available for students who find that standard classroom seating is not usable.

Code of Academic Integrity

Students are encouraged to share intellectual views and discuss freely the principles and applications of course materials. However, graded work/exercises must be the product of independent effort unless otherwise instructed. Students are expected to adhere to the UA Code of Academic Integrity as described in the UA General Catalog. See:
https://deanofstudents.arizona.edu/sites/deanofstudents.arizona.edu/files/code_of_academic_integrity.pdf

The University Libraries have some excellent tips for avoiding plagiarism available at:
<http://new.library.arizona.edu/research/citing/plagiarism>

UA Nondiscrimination and Anti-harassment Policy

The University is committed to creating and maintaining an environment free of discrimination,
<http://policy.arizona.edu/human-resources/nondiscrimination-and-anti-harassment-policy>

Our classroom is a place where everyone is encouraged to express well-formed opinions and their reasons for those opinions. We also want to create a tolerant and open environment where such opinions can be expressed without resorting to bullying or discrimination of others.

Additional Resources for Students

UA Academic policies and procedures are available at:
<http://archive.catalog.arizona.edu/2015-16/policies/aaindex.html>

Student Assistance and Advocacy information is available at:
<http://deanofstudents.arizona.edu/student-assistance/students/student-assistance>

The University of Arizona provides a wide variety of resources to help you feel more at home in the UA environment. Examples of student resource/cultural centers include:

- The African-American Student Center

- The Asian & Pacific American Student Center
- The Guerrero Student Center
- The Immigrant Student Resource Center
- The LGBTQ+ Student Center
- The Native American Student Center
- The Transfer Student Center
- The Veterans Education and Transition Services Center
- The Women & Gender Resource Center

We encourage you to take advantage of the community, support, and learning opportunities afforded by these centers, and to encourage your friends and colleagues to do the same.

Subject to Change Statement

Information contained in the course syllabus, other than the grade and absence policy, may be subject to change with advance notice, as deemed appropriate by the instructor.

ASTR 170 B2 Observing Log

Telescope Operator Stamp

Name: _____

Student ID: _____

Observing Date: _____

wing(s) of what you observed

Use the space below AND the back of this page to provide a detailed description of the objects you viewed (as if you were describing what the objects looked like to a person who had his/her eyes closed). Include the time of your observation, the direction you were looking, important names and labels. Describe the appearance of the objects, including how they may have looked different than your expectations.
