

The University of Arizona
ASTR 333: Astronomy and the Arts
Dr. Richard L. Poss
Fall 2016

Description:

This course examines the intersection of astronomy and the arts by studying astronomical ideas as they occur in works of art, literature, and music. Students will be exposed to a diverse assortment of cultural works from different periods, all portraying and responding to astronomical ideas. From frescoes in ancient Rome to contemporary space painting, we will examine the artifacts for what they reveal about both the poetic and the scientific worlds. In this process students will become acquainted with the details of the astronomical content which is the context for the work. Classroom sessions will be a combination of lecture and discussion. Participants study the materials first, and then we will discuss them in class. There will be reading quizzes, mid-term exams, a final exam, small writing assignments, and a research project.

We also want to create a tolerant and open environment where such opinions can be expressed without resorting to bullying or discrimination of others.

INTEGRITY: Absolute academic integrity is expected of every student in all academic activities. All students are expected to be aware of and follow the *University of Arizona Code of Academic Integrity*. The *Code* prohibits all forms of academic dishonesty, including cheating, plagiarism, and fabrication. The repercussions for all of those found guilty of violating the *Code* will include loss of credit for the work (grade=0) and may include failure of the course or more extreme measures.

PLAGIARISM: Students are encouraged to share intellectual views and discuss freely the principles and applications of course materials. However, graded work/exercises must be the product of independent effort unless otherwise instructed. Students are expected to adhere to the UA Code of Academic Integrity as described in the UA General Catalog. See <http://deanofstudents.arizona.edu/academic-integrity/students/academic-integrity>.
