

JAMES BOND WORKS SAFELY, DO YOU?

Did you know the Safety Manual has been updated? Here are some things you can find in the new version:

CHEMICAL WASTE DISPOSAL

Are you aware there is a very specific procedure when it comes to disposing of chemical waste? If not, you'll want to look through the "Hazard Communication and Chemical Safety" section of the safety manual to read up on it. And if you do know the procedure, visit the manual anyway to refresh your memory!

METRICS FOR SAFETY PERFORMANCE

Did you know you will now be evaluated for safety performance? Take some time to familiarize yourself with the new metrics, which can be found in the "Metrics for Safety Performance" section of the safety manual.

TRAINING REQUIREMENTS

Have you ever wondered what exactly you're supposed to know when it comes to safety? Visit the "New Employees Training Requirements" in the safety manual to view a chart that details the required training areas for each department.

HEARING CONCERNS

You can find the answers to all of your hearing-related questions, including those concerning audiograms, noise training, and noise conservation programs.

REIMBURSEMENT POLICIES

Are you unsure if you can be reimbursed for your safety purchases? Check the safety manual for policies about steel toed shoes, prescription safety eyewear, custom molded earplugs, and more!

ACCESS TO POTTY POSTERS

Current potty posters hang in every bathroom of Facilities ranging from SO to remote telescope sites, but if you would like to peruse past posters, they are available on the SO safety website!
