

Steward Observatory Fire Emergency Procedures

In the event of a fire alarm, all occupants of university buildings are required to:

1. **EVACUATE** the building
- and*
2. **REPORT** to a proper evacuation area.

Steward Observatory,
August 2007

Key Points For Fire Safety:

- Before Evacuation,
 - **Shut down** lab equipment/procedures involving heated reactions.
 - **Close** all doors behind you.
- Always **use the stairs**. Never use an elevator in an evacuation.
- Assist **mobility-impaired** persons to stairwell and notify Tucson Fire Department of their locations.
- You must evacuate to at least **50 feet** away from the building to the designated evacuation areas.
- You cannot return to the building in question until the UAPD has signaled "**all clear**" in a designated evacuation area.
